Love working with people?
Want to teach, but not in a classroom?
Looking for a job with flexibility, creativity, and commitment?

**Basic Qualifications:**
Master’s degree in journalism, communications, or a related field required. Minimum of 5 years experience in a communications field required; experience in news writing for daily newspapers preferred. Demonstrated skill in news reporting and writing required; additional skills in media relations and development of marketing materials preferred. Excellent interpersonal skills required. Ability to speak Spanish, particularly in interview situations with Spanish-language news media, strongly preferred. Skills in basic photography preferred. Some travel necessary. Must have valid driver’s license.

**Administrative Relationships:**
Works under the supervision of the Agricultural Communications unit head or designated supervisor. Works cooperatively with the Bexar County Extension director and leadership at The Texas A&M University System Agricultural Research and Extension Centers in Uvalde and Corpus Christi.

Works cooperatively with other faculty and staff within Agricultural Communications and The Texas A&M University System Agriculture Program.

**Major Job Responsibilities:**
Works with agriculture and consumer sciences experts to prepare and disseminate news, feature materials, and photos that reflect the work of Texas Cooperative Extension and the Texas Agricultural Experiment Station for the people of Texas. Develops effective working relationships with print and broadcast media in region and across state. Advises and plans communications elements of the Agriculture Program’s marketing and public relations efforts. Develops, implements, and supports educational programs that increase the communications skills of Agriculture Program faculty. Develops, implements, and supports communications elements of major Extension educational programs in region and advises region’s Agriculture Program leadership on conducting public and media events.
