Stage 1 Storyboard

Audience:
The website I will be creating is for the Rough Riders 4-H club in Kleberg County, Texas. The intended audience is anyone interested in learning more about 4-H and more particularly those interested in joining the Rough Riders club. Also, this website will be useful for current members as a way for them to view current photos and get this year’s club information. The purpose of this website is to inform both prospective and current Rough Riders members on the club’s activities and events and show fun photos of this year’s officers, events, livestock shows, and other projects.

Content:
This website will primarily contain information on what the Rough Riders 4-H club is all about. The Home page will contain information such as what the club does, where it meets, current officers, eligibility, and projects that the club completes annually. There will be a “4-H Activities” page which will contain a detailed list on the projects members can participate in as well as animals they can raise for Livestock Shows and other 4-H competitions. A “Livestock Show” page will contain a description on the annual Kleberg-Kenedy Junior Livestock Show and display photos of 4-H’ers with their livestock show projects. This website will contain a “Photos” page that will contain current photos with captions of 4-H’ers at random events. There will also be a “What is 4-H?” link that will lead to a National 4-H information page, as well as a “How to Join” or “Contact Us” page that will contain emails and phone numbers of the club sponsor as well as the County Extension Service.

Design/Colors/Graphics/Text:
The main design of my website will be geared towards resembling the official 4-H design, including the hunter green used and corresponding white or tan borders and text. I plan to incorporate a rope design around my text block in the center of the main page, as well as creating the “Rough Riders” title in the connecting rope. I plan to use many fun photos with captions of 4-H’ers at different events so that prospective members can be encouraged to join. Any other images will match the 4-H or cowboy theme associated with the club. The website will not include a lot of animation in order for quick and easy uploading on different computers.

Technologies:
I plan to use Notepad to complete the code for my site, and possibly Photoshop or the Paint program to create the unique “Rough Riders” title in rope connecting as a rope border around my text. I will also refer to the suggested websites for help on creating codes and colors for the site.

Communication:
My website will contain a “Contact Us” link that will lead to a page where prospective members can get information on how to join and contact the club sponsor or County Extension Service via email or phone. I plan on having the website contain all of the links to the different pages on the left side of the home page, so that every other page is displayed to the right so that the viewer never gets lost.
